eFinaX BizCard

B2B commerce : Web based payment solution for enterprises

(Korea Bank Development Capital)

- Corporate purchase card system
- Level 1,2,3 data support through internet
- Web card terminal (Level 1,2)
- Web purchase client (Level 1,2,3)
- e-business corporate payment solution
- Card reader, printer device support
- Customizable MIS interface
- XML-EDI translation

eBizFor (e Business For ...) Family

Web based solutions and development tools for corporate e-business

eBizFor NetFolio	Web application development tool
eBizFor BizMail	e-Mail Marketing Solution
eBizFor EIS	Web based executive information system
eBizFor HRS	Web based human resource system
eBizFor XML MS	XML based messaging center solution

eBizFor NetFolio

Web application framework providing runtime engine and development tools

Features & Benefits

- -No CGI programming needed
- -Fast database interface
- -Provide Application Framework and Template
- -Provide user defined logic
- -Auto generate JSP(Java Server Page) / Menu
- -Support record processing, table, graph, report printing
- Support interface with MS Excel and other Windows Applications

Components

- NetFolio Script (Support Servlet and F-CGI)
- NetFolio Plugin
- NetFolio Data Manager

Applications

- -Web Trading System
- -Web Banking System
- -Credit card inquiry system
- -Web MIS/EIS
- -Other Web based applications

eBizFor BizMail

e-mail casting solution for DB marketing

- DM cost reduction by automating regular e-mail service
- High quality customer relationship management via various mail contents such as birthday and anniversary celebration, new goods information, hobby/life information, etc.
- Customer response analysis system
- Mail acknowledgement, customer satisfaction, survey features
- Easy casting system for mail creation and sending

Hana Bank

eBizFor EIS

Web based information system for corporate personnel, finance, accounting, sales, etc.

Developed with NetFolio

Generate various charts and presentation data Create business plan via simulation
